

If you are reading this, you have decided to reconfigure your Corvette CCM for reasons of professional repair, reconfiguration, or other reasons.

The CCM is protected against reprogramming from the factory unless one of two conditions are met.

Software unlock: Less than 100 miles logged (Unlikely, unless you have a brand new CCM)

Hardware unlock: Open the CCM case and carefully ground the pin in the following diagram, marked with a red dot, during programming.

Please do so at your own risk.
